JOB POSTING

Section 1. The parties recognize that GW salaried/stipend appointments are usually made without posting through time-of-admission appointments, relationships with faculty members, and internal departmental or interdepartmental arrangements.

Section 2. Departments or Programs that wish to fill current vacancies from within or beyond the department, whether hourly or stipended, will post these employment opportunities, not otherwise assigned, on a University-wide basis in order to ensure that all qualified graduate students are given equal opportunity to apply for anticipated openings. Such University-wide postings shall be made available via a single, centralized University on-line information system accessible to all graduate students.

Section 3. All job postings must include: title, job description, department or program, lab (if applicable), expected number of hours per week, salary or hourly pay rate, any relevant required knowledge or experience, up-to-date contact information regarding the posting, an employment nondiscrimination statement, and notification that such position shall be covered by this collective bargaining agreement.
